

# GENEROUS WITH LIGHT, ECONOMIC IN CONSUMPTION

Very high efficiency  
of up to 167 lm/W

## THE NEW LEDVANCE HQL LED FILAMENT

The ideal response to rising energy prices. LEDVANCE HQL LED FILAMENT lamps save up to 77 % energy compared to mercury vapor lamps and operate on CCG for HQL or mains voltage. Other benefits: 100 % light without any warm-up time, 360° beam angle and two available light colors. What's more, their frosted full-glass bulb hardly differs from that of traditional HQL lamps so they can be used in any existing luminaire.
