

GENEROUS WITH LIGHT, ECONOMIC IN CONSUMPTION

THE NEW LEDVANCE HQL LED FILAMENT

Our response to rising energy prices. The new LEDVANCE HQL LED FILAMENT lamps for street and area lighting save up to 77 % energy as direct replacements for mercury vapor lamps. They operate on CCG for HQL or mains voltage and offer instant 100 % light without any warm-up time. Their frosted full-glass bulb with its 360° light distribution is hardly any different from that of traditional HQL lamps so existing luminaires and reflectors can continue to be used.

- For streets, areas, pedestrian zones and parks
- Suitable for operation with conventional control gear (CCG) for HQL or 230V mains voltage
- Very high efficiency of up to 167 lm/W
- Up to 77 % lower energy consumption than traditional HQL lamps
- Available in 4,000 K and 2,700 K light colors
- Very low weight
- Protection class: IP65
