

Product Environmental Profile

TeSys Deca thermal overload relays 48-65 A-class 10A

General information

Representative product	TeSys Deca thermal overload relays 48-65 A-class 10A - LRD365
Description of the product	The main purpose of the thermal overload relays is to detect overload currents in order to protect the motor.
Functional unit	The functional unit of the LRD365 is to detect overload currents in order to protect the load for 20 years. Standardized product characteristics to provide: rated insulation voltage: 690V conventional free air thermal current: 5A rated operational voltage: 690V AC rated impulse withstand voltage: 6KV thermal protection adjustment range:48-65A tripping class:10A

Constituent materials

Reference product mass 432 g including the product, its packaging and additional elements and accessories

Plastics	42.1%
Metals	44.6%
Others	13.3%

Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 2 January 2013, amended in March 2015, 2015/863/EU and in November 2017, 2017/2102/EU) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers – PBDE), Bis (2-ethylhexyl)phthalate - DEHP, Benzyl butyl phthalate– BBP, Dibutyl phthalate - DBP, Diisobutyl phthalate - DIBP) as mentioned in the Directive.

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website <http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page>

Additional environmental information

The TeSys Deca thermal overload relays 48-65 A-class 10A presents the following relevant environmental aspects

Manufacturing	Manufactured at a Schneider Electric production site ISO14001 certified
Distribution	Weight and volume of the packaging optimized, based on the European Union's packaging directive Packaging weight is 57 g, consisting of Cardboard (100%) Product distribution optimised by setting up local distribution centres
Installation	Ref LRD365 does not require any installation operations.
Use	The product does not require special maintenance operations.
End of life	End of life optimized to decrease the amount of waste and allow recovery of the product components and materials This product contains Plastic with brominated FR(105.586g) that should be separated from the stream of waste so as to optimize end-of-life treatment. The location of these components and other recommendations are given in the End of Life Instruction document which is available on the Schneider-Electric Green Premium website http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page Recyclability potential: 73% Based on "ECO'DEEE recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).

Environmental impacts

Reference life time	20 years			
Product category	Other equipments - Passive product - non-continuous operation			
Installation elements	No special components needed			
Use scenario	load rate / rated current (In): 30 % of In percentage of utilization time: 30%			
Geographical representativeness	Europe			
Technological representativeness	The main purpose of the thermal overload relays is to detect overload currents in order to protect the motor.			
Energy model used	Manufacturing	Installation	Use	End of life
	Energy model used: France	Electricity mix; AC; consumption mix, at consumer; 230V; FR	Electricity mix; AC; consumption mix, at consumer; 230V; FR	Electricity mix; AC; consumption mix, at consumer; 230V; FR

Compulsory indicators		TeSys Deca thermal overload relays 48-65 A-class 10A - LRD365					
Impact indicators	Unit	Total	Manufacturing	Distribution	Installation	Use	End of Life
Contribution to mineral resources depletion	kg Sb eq	3.95E-04	3.94E-04	0*	0*	9.52E-07	0*

* represents less than 0.01% of the total life cycle of the reference flow

Life cycle assessment performed with EIME version EIME v5.9.3, database version 2022-01 in compliance with ISO14044.

The use phase is the life cycle phase which has the greatest impact on the majority of environmental indicators (based on compulsory indicators).

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.
